Act of Parliament July 22d. 1690. The Term of Whitſunday, is appointed to be alwayes kept on the 15th. of May yearly, in all time coming. And Martinmas as former uſe was, on the 11th. of November.

Betwixt Candlemas day, February 2d, and Fastens-even day, which is February 5th.. makes inclusive 2 days.

# Of the ECLIPSES this Year 1695.

*There are four Eclipses this Year, viz. two of the Sun, and two of the Moon.*

**T**HE first will be of the Sun, upon the first day of *June*, 13 min after 5. afternoon. in the 21 d: 38. min. of *Gemini*, being but small: It is celebrated in the 8: house of the Heavens: By the Learned it prognosticates to great Personages Mortality, and Rablous Insurrections, &c. which the LORD keeps from.

The other of the Sun and Moon invisible to us, it is needless to trouble the Reader with.

The second Visible Eclipse is of the Moon, on the tenth of November, 6. min. before 8 at night, it falls near among the Stars of the *Pleiades*; And the Air being clear, the Eclipse of the Moon will be perceived, and to lose its light.

Upon the 12. day of *August* this year 1695, there will fall out a great (some say famous) Opposition of *Saturn* and *Mars*, in the 9. degrees of *Cancer* and *Capricorn*: If I should tell my Judgement, its like some would laugh, but leaves it to the Knowledge of the Learned, &c. to give theirs.

*Advertisement, That the Stamping-work which did formerly belong to Joseph and William Youngs, Merchants in Edinburgh, does now wholly pertain to the said William Young, And any who have occasion for any of the said stamping, let them repair to the said Williams shop, in the North side of the Land-mercat of Edinburgh, where they have choice of several sorts of fashionable Stamping Figures, To be stamped and sold by the said William Young.*

## Profitable Observations and Notes.

**A**LL Measures of Longitude are deduced from Barley Corns  
Three Barley Corns make an Inch, Twelve Inches one Foot;  
Three Feet one Yard, Five Yards and an half one Statute  
Pole, or Perch; Forty Perches make a Furlong, Eight Furlongs  
make an English Mile, in a Mile are three hundred and twenty  
Perches or Poles, One thousand sixty six Paces: Ells, One thou-  
sand four hundred and eight; Yards, One thousand seven hundred  
and sixty: Feet, Five thousand two hundred and eighty: Inches,  
Sixty three thousand three hundred and sixty: and Barley  
Corns, One hundred ninety thousand and eighty.

The Circumference of the Earth and Sea, jointly is 25036 Miles,  
and the Diameter 7966 Mile, and its Semidiameter 3983 Miles,  
acording to English Mensuration.

### *The Dimensions of Scotland, England, Ireland, and the Adjacent Islands.*

**T**HE Length of Scotland, South and North, is 480 Miles; and  
the breadth East and West, is 165 Miles; the whole compass  
1100 Miles.

The Isle of Man is in length 28 Miles, the breadth 18 Miles, and  
in compass 91 Miles.

The Isle of Anglesey is in length 21 Miles, in breadth 18 Miles,  
and in compass 85 Miles.

The Isle of Wight is in length 22 Miles, in breadth 11 Miles, in  
compass 57 Miles.

The Isle of Garnsey is in length 13 Miles, in breadth 9 Miles, the  
whole Circumference is 36 Miles.

The Isle of Jersey is in length 10 Miles, in breadth 3 Miles, in  
compass 28 Miles.

The Length of England, from South to North, is 386 Miles  
the broadest place from the Lands end to Sandwich. is 279 Miles;  
The next broadest place, which is between St. Davids & Tarmouth  
in the East, is 240 Miles; The whole Compass of England, is 1532  
Miles.

The length of Ireland, North and South, is 303 Miles; The  
greatest breadth thereof, East and West, is 142 Miles; The whole  
compass of the main Land is 948 Miles.

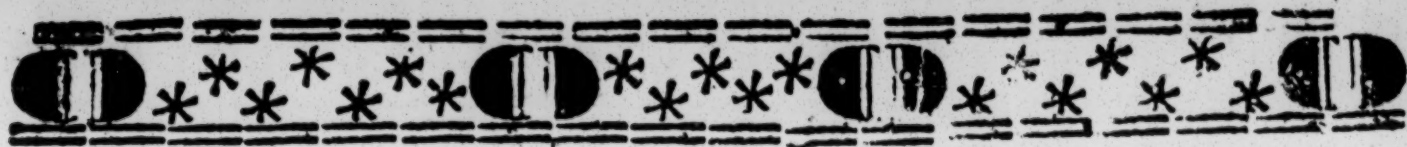

*Advertisement,* There are Printed and to be sold by John  
Reid, The Ten Commandments, with the Lords Prayer, and  
the Creed, all on a large Letter, on Lombart Paper, at  
7 s per piece, having Cuts. To be had at his Printing-House in  
Bells-Wynd, With all sorts of Pamphlets and Ballads for  
Chapmen-Merchants,

5

## The four Seasons of this Year 1695.

**T**HE Spring Quarter begins on Sunday, the 10 of March, when the Sun entereth into the Equinoctial sign *Aries*, making both day and night equal: Beginning with Rain and Wind.

**A**strological calculations say, Summer begins on Tuesday, the 11 day of June, for the Sun entereth into the highest degree of the Northern Tropick sign *Cancer*, and then is our longest day & shortest night. Making such a heat, that some cannot stay at home.

**A**utum or Harvest, called the fall of the leaf, begins on Friday September 13, the Sun entering into the second Equinoctial sign *Libra*: and maketh again the day and night of equal length. Let there be no time neglected to bring in your Corns.

**W**inter quarter begins on tuesday, the 11 of December, the Sun entering into the first degree of the Hiemal sign *Capricorn*, making to us the shortest day and the longest night, but not to all.

## The four Termly Quarters this Year.

**F**irst Termly Quarter is *Candlemass-Day*, being on Friday, the 2d: of February.

The second Quarter begins on tuesday, May first, the Vulgar reckon from May 3d, called *Rood-day*. (*Lambmass-day*.)

The Third Quarter begins on Wednesday, the 1 of August, called

The Fourth and last Termly Quarter, begins on Thursday, November 1, which is called *Hallow-day*.

## A Tide Table for Leith.

Shewing the Hour and Minut of high water at Leith for every day of the Moons Age, Increasing or Decreasing.

**The Use.** Seek the Moons Age in the first and second Column of the Table, and in the two last Columns you have the true time of full Sea at Leith.

**Example.** To find the full Sea the 2 day of June, 1695, I find the Moons Age by the following Table to be 1, which I find in the first Column of this Table, and against it in the last column I find 3 Hour, 3 Minuts, the true time of full Sea required.

Arady Table shewing the Age of the Moon  
every day throughout this Year, 1695.
